INTCO, a high-tech manufacturer of recyclable resources Reduce, Recycle, and Reuse. Stock Symbol 688087. INTCO has created a business model of whole industry chain which perfectly combines the two industries of "plastic recycling & reusing" and "fashionable consumer products".

INTCO has the ability to recycle and reuse 100,000 tons EPS foam, 50,000 tons food-grade PET bottle every year, using advanced plastic recycling technology, our main products include recycling compactor machines, r-PS pellets, framemouldings, photo frames, mirror frames, art frames, 3D wall panels, skirting boards, ceiling mouldings and other interior and exterior decorative materials. High-purity sorting, bottle-to-bottle cleaning, high-performance impurity removal and other technologies are used to produce r-PET fiber-grade and bottle-grade pellets, r-PET flakes and various r-PET packaging boxes, products have obtained GRS FDA and EFSA certifications, which are widely sold in more than 120 countries and regions all of the world.

In the future, INTCO will expand its r-PS pellets to 300,000 tons per year, r-PET pellets to 1 million tons per year, focusing on the advantages of whole industry chain of plastic reduce, recycle and reuse. It will also enlarge its "plastic family" by expanding its business horizontally to PE, PP, HDPE. Driven by independent innovation, INTCO will continue the R&D of plastic recycling technologies, to become a global leader in resource recycling, and contribute to the carbon recycling economy and the sustainable development of the earth!

High Quality Recycle

100%

100% PCR

We have a robust global recycling team to ensure that all raw materials purchased are 100% post-consumer recycled (PCR)

High Impurity Removal Rate

We strictly control the processing process to ensure the removal rate.

Food Grade

We have the ability to produce food-grade and filament-grade recycled PET materials.

Advanced Equipment

10-30 PPM High Purity Sorting
Bottle to Bottle Food-Grade Washing
